I. ANNOTATION

This course focuses on how to conduct an entrepreneurial business and manage innovations. It addresses how founders/ owners of entrepreneurial ventures and professional managers of entrepreneurial companies exploit business opportunities and innovation as a crucial part of the business itself. This course discusses multidisciplinary concepts and theories that are used to establish and deal with entrepreneurial operations. It will provide students also with an understanding of the financing options available to start-up and developing companies.

This course is aimed at developing profound knowledge and skills needed to identify and evaluate market opportunities for new businesses as well as an ability to prepare presentations and business plans to attract various stakeholders: employees, partners, investors and customers.
